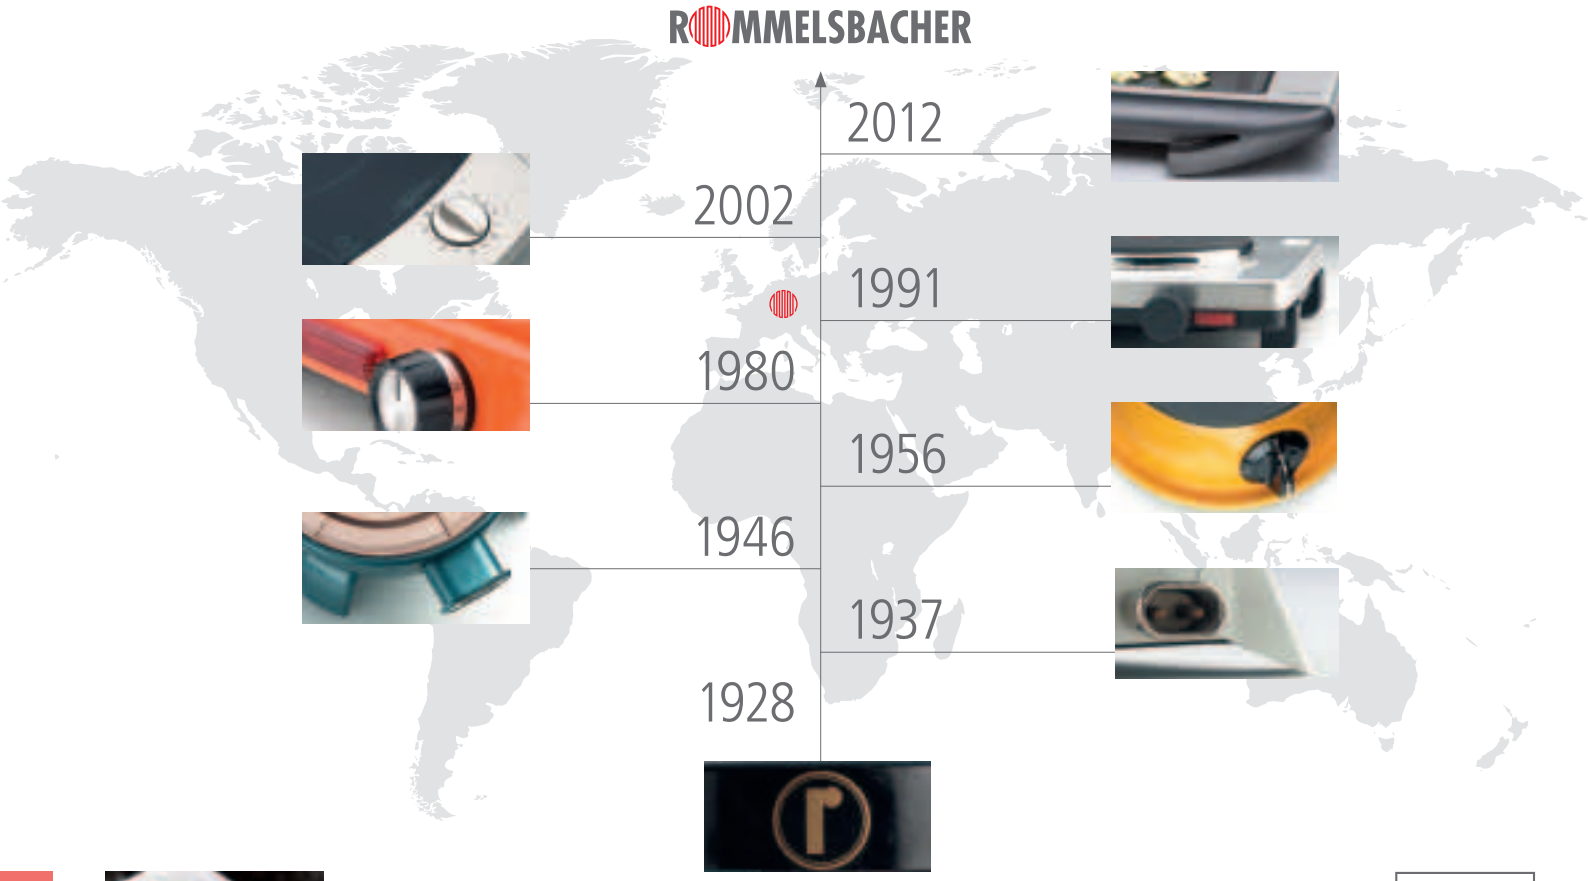
ROMMELSBACHER

PROGRAMME 2012/2013

PURE COOKING PLEASURE

EXPERIENCE & INNOVATION
MORE THAN 80 YEARS



Gustav Rommelsbacher

Quality Made in Germany

A lot has happened since the foundation of Rommelsbacher Company in 1928 by Dipl. Ing. Gustav Rommelsbacher, starting with cast iron heating plates under the brand "robusta" through to today's internationally known programme of small electrical appliances for kitchen and household.

Meanwhile, our medium-sized family enterprise is run by the third generation and led into the future with innovative ideas and dynamics.
"robusta" matured to "Rommelsbacher" – an assortment balanced between tradition and modern spirit, new trends and established products. Rommelsbacher is an expert for electrical single and double cooking plates and also produces them in Germany. With such a unique assortment of cooking plates we are successful all over the world: whether with the smallest automatic cooking plate in the world or a high-tech induction cooking plate with glass and stainless steel.

Over the years, the range has been expanded by attractive device groups. Rommelsbacher has set standards by picking up international trends and current highlights, but also by expanding traditional product lines and developing novelties made in Germany.
From the beginning Rommelsbacher brand committed itself to a high quality standard. This attitude as well as a dedicated team, reliable service and flexible reaction on customer requests has been making us successful on the markets at home and abroad for decades. With interesting novelties and the development of innovative cooking sectors such as "fun cooking", "healthy cuisine", "economic preservation" we will commit ourselves to the production site Germany and occupy a firm position in the sector "cultivated hospitality" with the Rommelsbacher range also in future.

HM 350/S

The powerful all-rounder – essential for every kitchen

- ergonomic design, easy and convenient operation
- powerful, low-noise and low-vibration motor
- 5 speed levels plus turbo level
- separate eject button
- terminal for blender stick
- detachable parts (except for blender stick) are dishwasher-proof

Including:
- 2 extra long stainless steel beaters
- 2 solid, extra long stainless steel dough hooks
- blender stick with stainless steel foot and 2-winged stainless steel blade
- mixing/measuring cup with lid and scaling for 0.8 l volume
- practical storage for all attachments

Type:	**HM 350/S**
Colour:	white
Power:	230 V · 350 W
Dimensions:	22 x 9 x 14 cm
EAN:	4001797 853004

SM 800/ES

Strong power with best features – 800 W pep up your kitchen

- ergonomic design, easy and convenient operation
- powerful, low-noise and low-vibration motor
- infinitely variable speed control plus turbo level
- smooth release of attachments

Including:
- solid stainless steel blender stick with effective splash guard and 2-winged stainless steel blade
- stainless steel whisk
- multi chopper with plastic container for 0.5 l volume and 2-winged stainless steel blade
- mixing/measuring cup with lid and scaling for 0.8 l volume

Full speed ahead – for perfectly enjoying cooking and baking.

Type:	**SM 800/ES**

CT 2215/IN Induction

Very safe, energy-saving, with high ease of use – top technology of German make

- suitable for all kinds of pots/pans with ferromagnetic bottom
- genuine Schott Ceran® cooking surface: 80 – 200 mm Ø, robust and easy to clean
- automatic pot recognition
- superior, easy-care casing made of brushed stainless steel
- shapely Softline design
- well-arranged, separate LED displays for time/ temperature/power
- easy regulation via electronically controlled touch control sensors
- 99-minute timer
- precise temperature selection in 21 levels from 60 °C to 260 °C
- power selection in 9 levels
- with power boost function for additional power
- automatic switch-off with signal tone
- integrated safety functions, indicators for residual heat, standby and operation

Type:	**CT 2215/IN**
Colour:	stainless steel
Power:	230 V · 2200 W
Dimensions:	30.5 x 41 x 7.5 cm
EAN:	4001797 195302

Induction – the quickest, most efficient and intelligent way of cooking

- heat is generated directly in the pot bottom
- induction coils (wound copper wire) generate alternating electromagnetic fields, even through fabric or paper
- the power is directly available after switching on the cooking plate
- high time and energy saving due to instantly available heat
- as effective as cooking with gas, however much safer
- automatic pot recognition provides best convenience
- low heat loss as the pot bottom is heated only
- the cooking zones stay almost cold and are only slightly heated by the pot
- the temperature can be controlled particularly accurately and precisely
- no further heating after switch-off, the heat supply is interrupted immediately, perfect safety is guaranteed
- spilt food does not burn in, thus the cooking surfaces are very easy to clean
